Faceless Tech Stack & Free Asset Directory

A curated compilation of 100% free, royalty-free, and open-access resources to produce studio-grade faceless videos with $0 monthly software overhead.

1. 100% Free 4K Stock Footage & Archival Repos

- **Pexels Video (pexels.com):** Millions of royalty-free 4K lifestyle, technology, and city clips. Zero attribution required for commercial use.
- **Pixabay Video (pixabay.com):** Vast catalog of abstract backgrounds, drone footage, and motion graphics.
- **NASA Image & Video Library (images.nasa.gov):** High-resolution space, satellite, rocket launch, and planetary footage in the public domain.
- **US National Archives & Records (archives.gov):** Declassified historical military footage, presidential broadcasts, and Cold War reels.
- **Wikimedia Commons Video (commons.wikimedia.org):** Global historical, geographic, and scientific video assets under Creative Commons.

2. Free Audio & Sound Design Repos

- **YouTube Audio Library:** Thousands of monetization-cleared music tracks and foley sound effects built directly into YouTube Studio.
- **Freesound.org:** Massive collaborative database of Creative Commons audio samples, whooshes, and atmospheric drones.
- **Audacity (audacityteam.org):** Open-source multi-track audio editor with professional noise removal, compression, and loudness normalization tools.

3. Video Editing Suites (No Watermarks)

- **CapCut Desktop:** Fast, intuitive timeline editing with automated kinetic captions and built-in transition presets.
- **DaVinci Resolve:** Hollywood-grade color grading, Fairlight audio mastering, and timeline editing completely free for commercial use.
